

Owners Corporations and COVID-19 Help is Here!

Are Apartment Blocks the new COVID-19 Super-spreaders?

Just like cruise ships strata buildings have the capacity to be super-spreaders of COVID-19.

Apartment buildings and strata blocks have many shared facilities and not all, such as lifts, can be closed during COVID-19 breakout periods.

Shared facilities such as lifts, foyers, stairwells, air-conditioning, garbage and laundry facilities all have the potential to spread COVID-19 and with the current Delta variant, that can occur very quickly, as seen with this recent lockdown of a [prominent strata building](#) in Sydney's east!

As all of Greater Sydney deals with the lockdown and NSW Health advice stating how difficult it is to control the spread of this new very contagious strain of COVID-19, Owners Corporations are grappling with a lack of power to help stop their strata blocks becoming the next victim of COVID-19.

Owners Corporation Assistance

To assist owners corporations with managing the situation (and bringing some control back) we have developed a COVID-19 by-law to assist you with the current situation.

For COVID-19 by-law assistance contact us [here now](#), we're happy to help.
