

e-Bike and e-Scooter Battery Fires in Strata on the Increase

By-laws that regulate e-Bikes and e-Scooters.

e-Bike and e-Scooter lithium-ion batteries have sparked a series of fires in strata apartment buildings and based on the following statistics* pose a major threat as they continue to rise.

- Between January 1 and September 15, 2023, Fire and Rescue NSW reported 149 battery-related incidents – a 16 per cent increase on the same time last year.
- Of these incidents, 22 per cent involved e-mobility devices – a 94 per cent increase on the same period the previous year.

All strata buildings should, before it's too late, put in place by-laws to regulate the storage and charging of e-scooters and e-bikes to help prevent fires from lithium-ion batteries.
